OFFICIAL-RECORD FACT

Tax information

The downloaded report displays the historical tax invoice-limit approval noted above. It does not provide a tax-credit grade in the reviewed sections.

SERICANT ANALYSIS

Careful reading

An empty disclosure section does not prove that no relevant matter ever existed in every regulator's records. Separate regulator searches may be required for a live engagement.

PAYMENT LICENCE AND CORPORATE STATUS ARE DISTINCT

The enterprise-filed licence entry is displayed as invalid. This is not an independently verified payment-licence cancellation date or a finding of misconduct. No separate regulator notice was reviewed.

09 / PUBLIC-RECORD DISCLOSURE CHECKS

Public-record disclosure checks

This section reports only the presence or absence of information in specified fields of the downloaded official report; it is not an independent court or asset search.

Movable-property mortgages	No information displayed	Report-scope observation	S-01

SERICANT ANALYSIS**Scope significance**

No conclusion about litigation history, enforcement exposure, insolvency or overall compliance should be drawn from these registry disclosure fields alone.

INFORMATION GAP

Separate court, enforcement, insolvency and regulator searches were not performed for this public sample.

10 / DEREGISTRATION STATUS

Deregistration status

The official report confirms the deregistered status and approval date but displays no liquidation information.

DATE	OBSERVED EVENT	SOURCE
29 July 1996	Company established	S-01
11 September 2024	Registered business scope and shareholder-name information changed	S-01
3 March 2025	Business term changed from a fixed end date to open-ended	S-01
21 August 2025	Chairperson change registered	S-01
27 August 2026	Approval date shown in S-01; not a separately verified deregistration date.	S-01

SERICANT ANALYSIS

Meaning of deregistration

The recorded status is deregistered. The exact deregistration date is not separately established here. Before any transaction or payment, verify the current status and responsible legal entity.

INFORMATION GAP

Liquidation and succession

S-01 displays no liquidation information and does not include the liquidation report, creditor outcomes, employee arrangements, contract succession, asset transfers, or intellectual-property and data disposition.

Recommended verification before reliance

- Obtain a newly generated official registry report immediately before a consequential decision.
- Request the deregistration filing basis, liquidation report and evidence addressing creditor claims where relevant.
- Identify the entity responsible for former contracts, warranties, data, domains, software and outstanding claims.
- Verify any invoice, bank account, licence or payment instruction against the currently responsible legal entity.

DATE QUALIFICATION

S-01 lists an approval date of 27 August 2026 and a deregistered status. These separate fields do not, by themselves, establish the precise deregistration date. Licence cancellation is a separate matter.

Annual-report indicators

Annual reports are enterprise-filed disclosures. They provide historical indicators but are not independently audited by Sericant.

REPORT YEAR	INDICATOR	DISCLOSED VALUE	ASSESSMENT
2025	Social-insurance participation	1 person	Sharp reduction from 2024; not necessarily total headcount
2024	Social-insurance participation	27 persons	Historical enterprise-filed indicator
2025	Website / online store	No	Enterprise-filed year-end field
2024	Website	ChinaUMS Shenzhen webpage	Historical affiliation or hosting indicator only

SERICANT ANALYSIS

Evidentiary weight

The fall in social-insurance participation from 27 to 1 is consistent with substantial operational contraction before deregistration, but the annual-report field does not establish total workforce or the reason for the change.

INFORMATION GAP

Financial scale and operating cessation

Assets, revenue, profit, tax and liabilities were marked as not publicly disclosed. No audited accounts, payroll records or closure plan were reviewed.

12 / INFORMATION GAPS & FURTHER ENQUIRIES

Information gaps & further enquiries

Liquidation completion and creditors	Relevant to outstanding claims and liabilities	Deregistration filing and liquidation report	High

Data, software and domain disposition	Relevant to continuity, privacy and IP rights	Assignment and handover records	Medium
Court and regulatory exposure	Not covered comprehensively by S-01	Separate official court and regulator searches	Medium
Post-deregistration use of name	Prevents dealing with a non-active entity	Current website, invoice and bank-account verification	High

DECISION BOUNDARY

This public sample does not recommend whether to transact with any shareholder, successor or affiliate. It identifies evidence that should be obtained before a consequential decision.
